University *of* Idaho

Providing information management, services, and tools for wildland fire and natural resource professionals.

The Fire Research and Management Exchange System (FRAMES) provides searchable fire-related information, a platform for data sharing and storage, development of new tools, and support to federal wildland fire management agencies in the United States. This online resource was developed for wildland fire managers, researchers, and other stakeholders by the University of Idaho in collaboration with the U.S. Forest Service Rocky Mountain Research Station.

Information at your fingertips:

• The Resource Cataloging System (RCS), a searchable online database of wildland fire-related documents, tools, videos, projects and data. The RCS houses thousands of records and also provides access to the Tall Timbers E.V. Komarek Fire Ecology Database

• The MyFRAMES Collaboration Space for user groups to share announcements, files, calendars, and host discussion forums

• Online training developed by Wildland Fire Management RD&A Fuels and Fire Ecology (formerly NIFTT), the National Wildland Fire Coordination Group (NWCG), LANDFIRE, and the University of Idaho

• The FRAMES Emissions and Smoke Portal with educational materials on air quality and smoke management developed by the NWCG Smoke Committee (SmoC) and the University of Idaho

• Search or browse the latest fire research organized by subject area, geographic area, and partner site

• Archived webinars from IAWF, JFSP and the Wildland Fire Lessons Learned Center

• Events and Announcements about webinars, conferences, meetings, workshops, training, and jobs

FRAMES resources are organized in three categories: Partner Sites, Regions, and Topics.

Partner Sites

Information that Managers and Researchers can use

The Resource Cataloging System (RCS) is a tool for wildland fire and other natural resource professionals to search or browse the latest fire research organized by six resource groups: projects, models & other tools, documents, web pages, data, and programs (organizations).
